

VIRGINIA HOT LANES

Some things can't wait for traffic.

Virginia HOT Lanes project launches new Web site

The Virginia Department of Transportation (VDOT) and its partner, Fluor -Transurban, launched www.virginiahotlanes.com on May 16, 2007 to provide the public with a central, comprehensive source of information on the HOT lanes projects being developed on I-95/395 and the Capital Beltway.

HOT lanes will provide congestion relief and new travel choices to the Northern Virginia and Fredericksburg regions.

The site will be updated regularly with important information such as:

- Community meeting dates and times
- Latest project plans and designs
- How to use HOT lanes
- Progress in advancing environmental reviews
- Information and resources to help prepare for construction

The site will serve as a two-way communications channel between the project and the public. The public may submit questions about Virginia HOT lanes to inquiries@virginiahotlanes.com or sign up for periodic email updates.
